

My Project Report

One-line description of the project

Best result: | Accuracy 0.00 | F1 0.00

One short paragraph stating the goal of the project and what this report covers.

0. What This Project Is

Explain in plain English what the project does and why it matters.

1. The Data

Describe the dataset(s): source, size, features, target.

File	Rows	Has label?	Used for
train.csv	00,000	Yes	Training + evaluation
test.csv	00,000	No	Final predictions only

2. Problems Encountered & How They Were Solved

Problem 1 — short title

Describe the problem, then **Solution:** describe the fix.

Problem 2 — short title

Describe the problem, then **Solution:** describe the fix.

3. What Was Done (Step by Step)

- **Explore:** what you found in the data.
- **Clean:** what you removed or fixed.
- **Prepare features:** encoding / scaling / engineering.
- **Train & tune:** models tried and how they were validated.
- **Explain & report:** explainability and outputs produced.

4. Exploratory Analysis

Caption explaining what this chart shows.

5. Results

Summarise how models performed on held-out data.

Model	Accuracy	Precision	Recall	F1	ROC AUC
Model A (best)	0.000	0.000	0.000	0.000	0.000
Model B	0.000	0.000	0.000	0.000	0.000

What each score means

- **Accuracy** — share of all cases classified correctly.
- **Precision** — when it predicts positive, how often it is right (few false alarms).
- **Recall** — of all real positives, how many were caught (few misses).
- **F1** — single balanced score combining precision and recall.
- **ROC AUC** — overall ability to separate the classes; 1.0 is perfect.

6. Explainability

Which features drive the predictions, and why that makes sense.

Feature impact summary.

7. What the Outputs Are

File / folder	What it is
reports/Report.pdf	This report.
models/best_model.pkl	The chosen trained model.
outputs/predictions.csv	Scored records.

8. Honest Caveat

Limitations to keep in mind

State anything that could make real-world performance differ from the reported scores.

9. Business Impact

- Impact point 1.
- Impact point 2.
- Impact point 3.
